A Modefin Venture

BUILT ON EXPERIENCE

CONNECTING INDIAN AGRICULTURE TO GLOBAL MARKETS

Established in 2016, VezByNature is an **Integrated Agri and Food Processing** business entity with a strong focus on sourcing, processing and exporting agricultural produce and food ingredients. We work with farmers, plantation owners and producer communities, supplying to **food and beverage manufacturers, importers, exporters and trade partners** across **India** and **International markets**.

We work with a diverse range of Indian agricultural products, including **Coffee, Fruits and Vegetables** while our processing capabilities extend into **Aseptic Fruit Pulps & Concentrates and IQF fruits & vegetables.**

Our approach is built around **creating stronger connections between producers and markets,** giving farmers and plantation communities access to organised demand while giving international buyers a dependable source of Indian agricultural products and food ingredients.

MISSION

To connect India's agricultural strengths with global markets, creating lasting value for farmers, partners and customers across the food value chain.

VISION

To source, process and deliver quality Indian agricultural products and food ingredients through strong producer relationships, reliable infrastructure and responsible market access.

INDIAN COFFEE

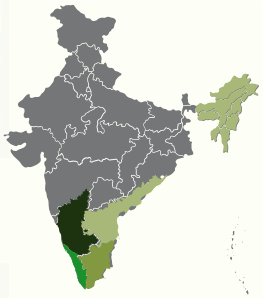

RICH ORIGINS. DISTINCT CHARACTER.

India's coffee is predominantly cultivated in the **shaded highlands of the Western Ghats**, where **elevation**, **rainfall**, **soil** and plantation ecosystems create diverse growing conditions.

Karnataka, **Kerala** and **Tamil Nadu** form India's traditional coffee belt, with newer cultivation also emerging in **Andhra Pradesh, Odisha and the North-East.**

Vez by Nature works closely with coffee farmers and plantation owners across these regions to source, process and supply high-quality **Arabica, Robusta and specialty coffees** to global markets.

INDIA'S MAJOR COFFEE GROWING REGIONS

WE ARE A SOURCING PARTNER FOR MAJOR GLOBAL CONGLOMORATES

IDEAL GROWING CONDITIONS

ELEVATION
600–1,600 meters above sea level

RAINFALL
Well-distributed rainfall

SOIL
Rich, well-drained, organic soils

SHADE
Grown under natural shade, supporting biodiversity and better bean quality

ARABICA VS ROBUSTA

ARABICA
Coffee arabica

- *Smooth, complex and sweet*
- *Fruity and floral notes*
- *Higher acidity*
- *Lower caffeine (0.8%–1.5%)*
- *Produces a thin, delicate crema*
- *Preferred for specialty coffees and premium blends*

ROBUSTA
Coffee canephora

- *Bold, earthy and strong*
- *Distinctive bitterness*
- *Lower acidity*
- *Higher caffeine (1.5%–4.0%)*
- *Produces a thick, long-lasting crema*
- *Adds body, strength and richness to espresso blends*

THE PILLARS OF GREAT COFFEE

THE ROAST
Develops aroma, flavour and body — from light and fruity to dark and intense.

THE BLEND
Combining beans from multiple origins to create a balanced & consistent flavour profile.

THE BREW
Extraction method — designed for espresso machines, filter coffee or specialty brewing.
